

Overview of MDA Survey

Heiko Vainsalu

Senior Expert on Technology

Agenda

- Interoperability
- Survey topics
- Findings

Context

- Better public services can be provided if MDAs **cooperate**.
- Cooperation is possible if **interoperability** exists.

Interoperability is ...

- ... principles for approaching cooperation on ICT.

- ... defining unified requirements for ICT procurements.

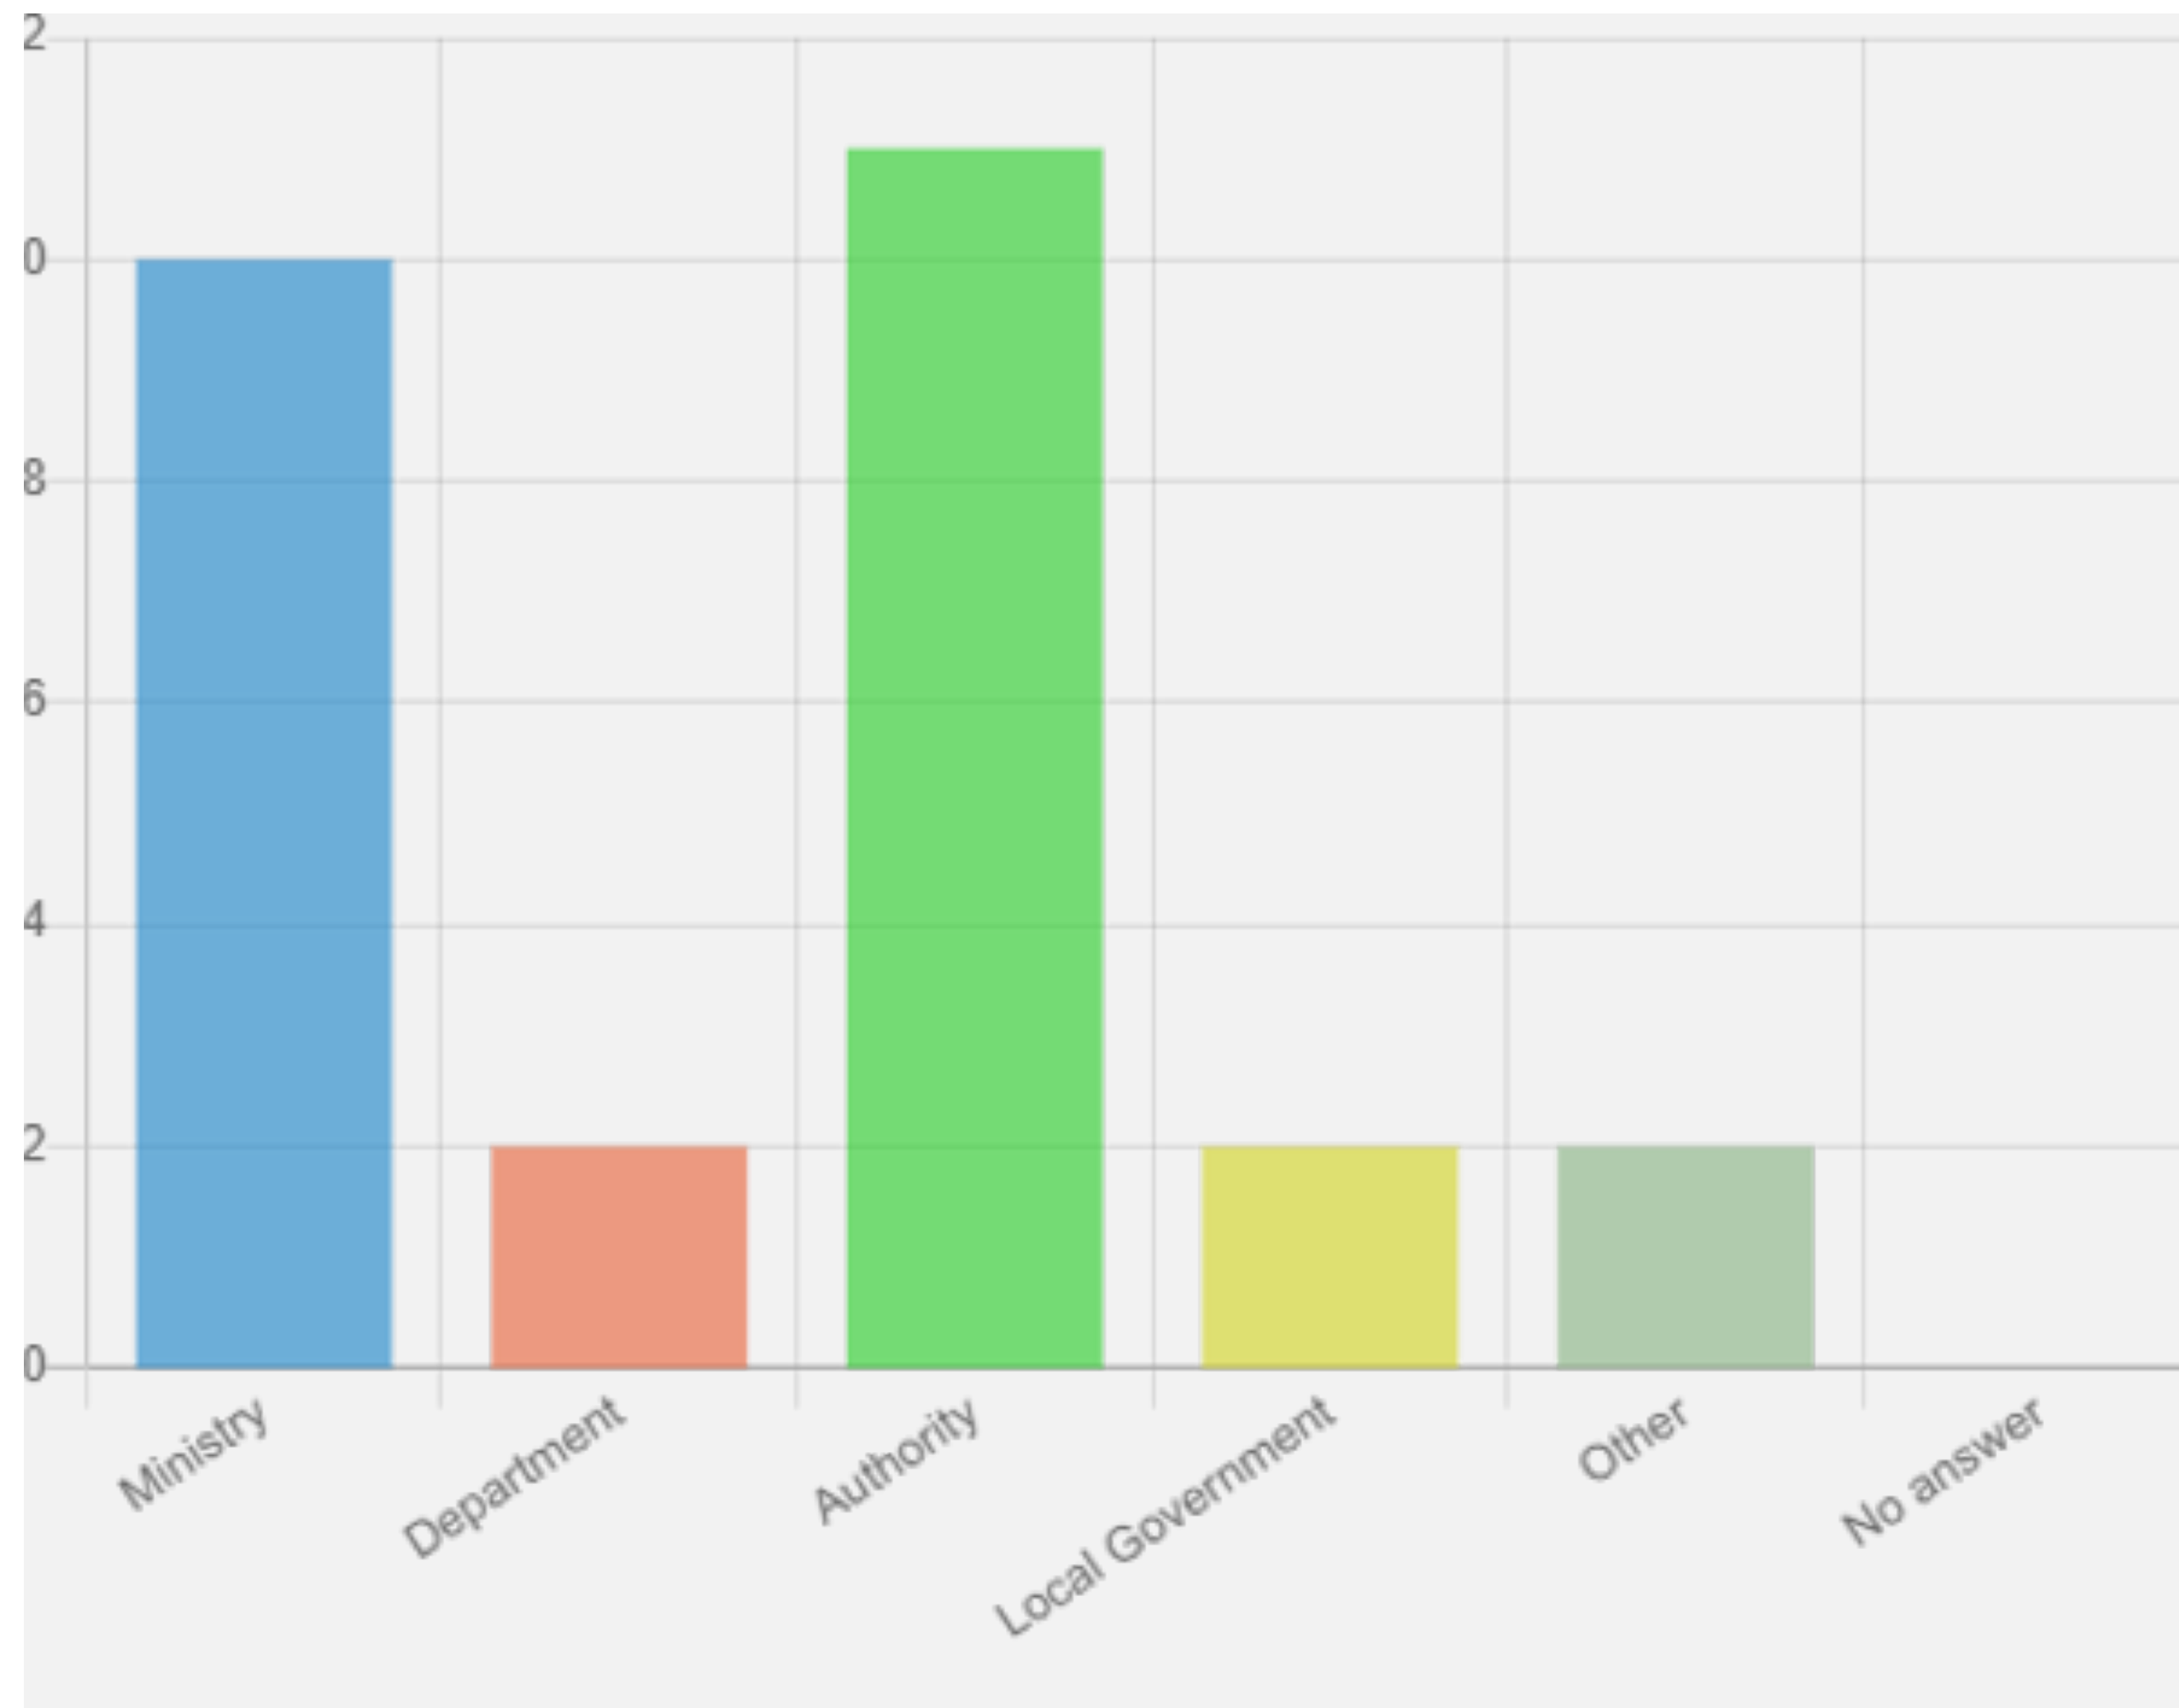

- ... declaring the requirements for information systems

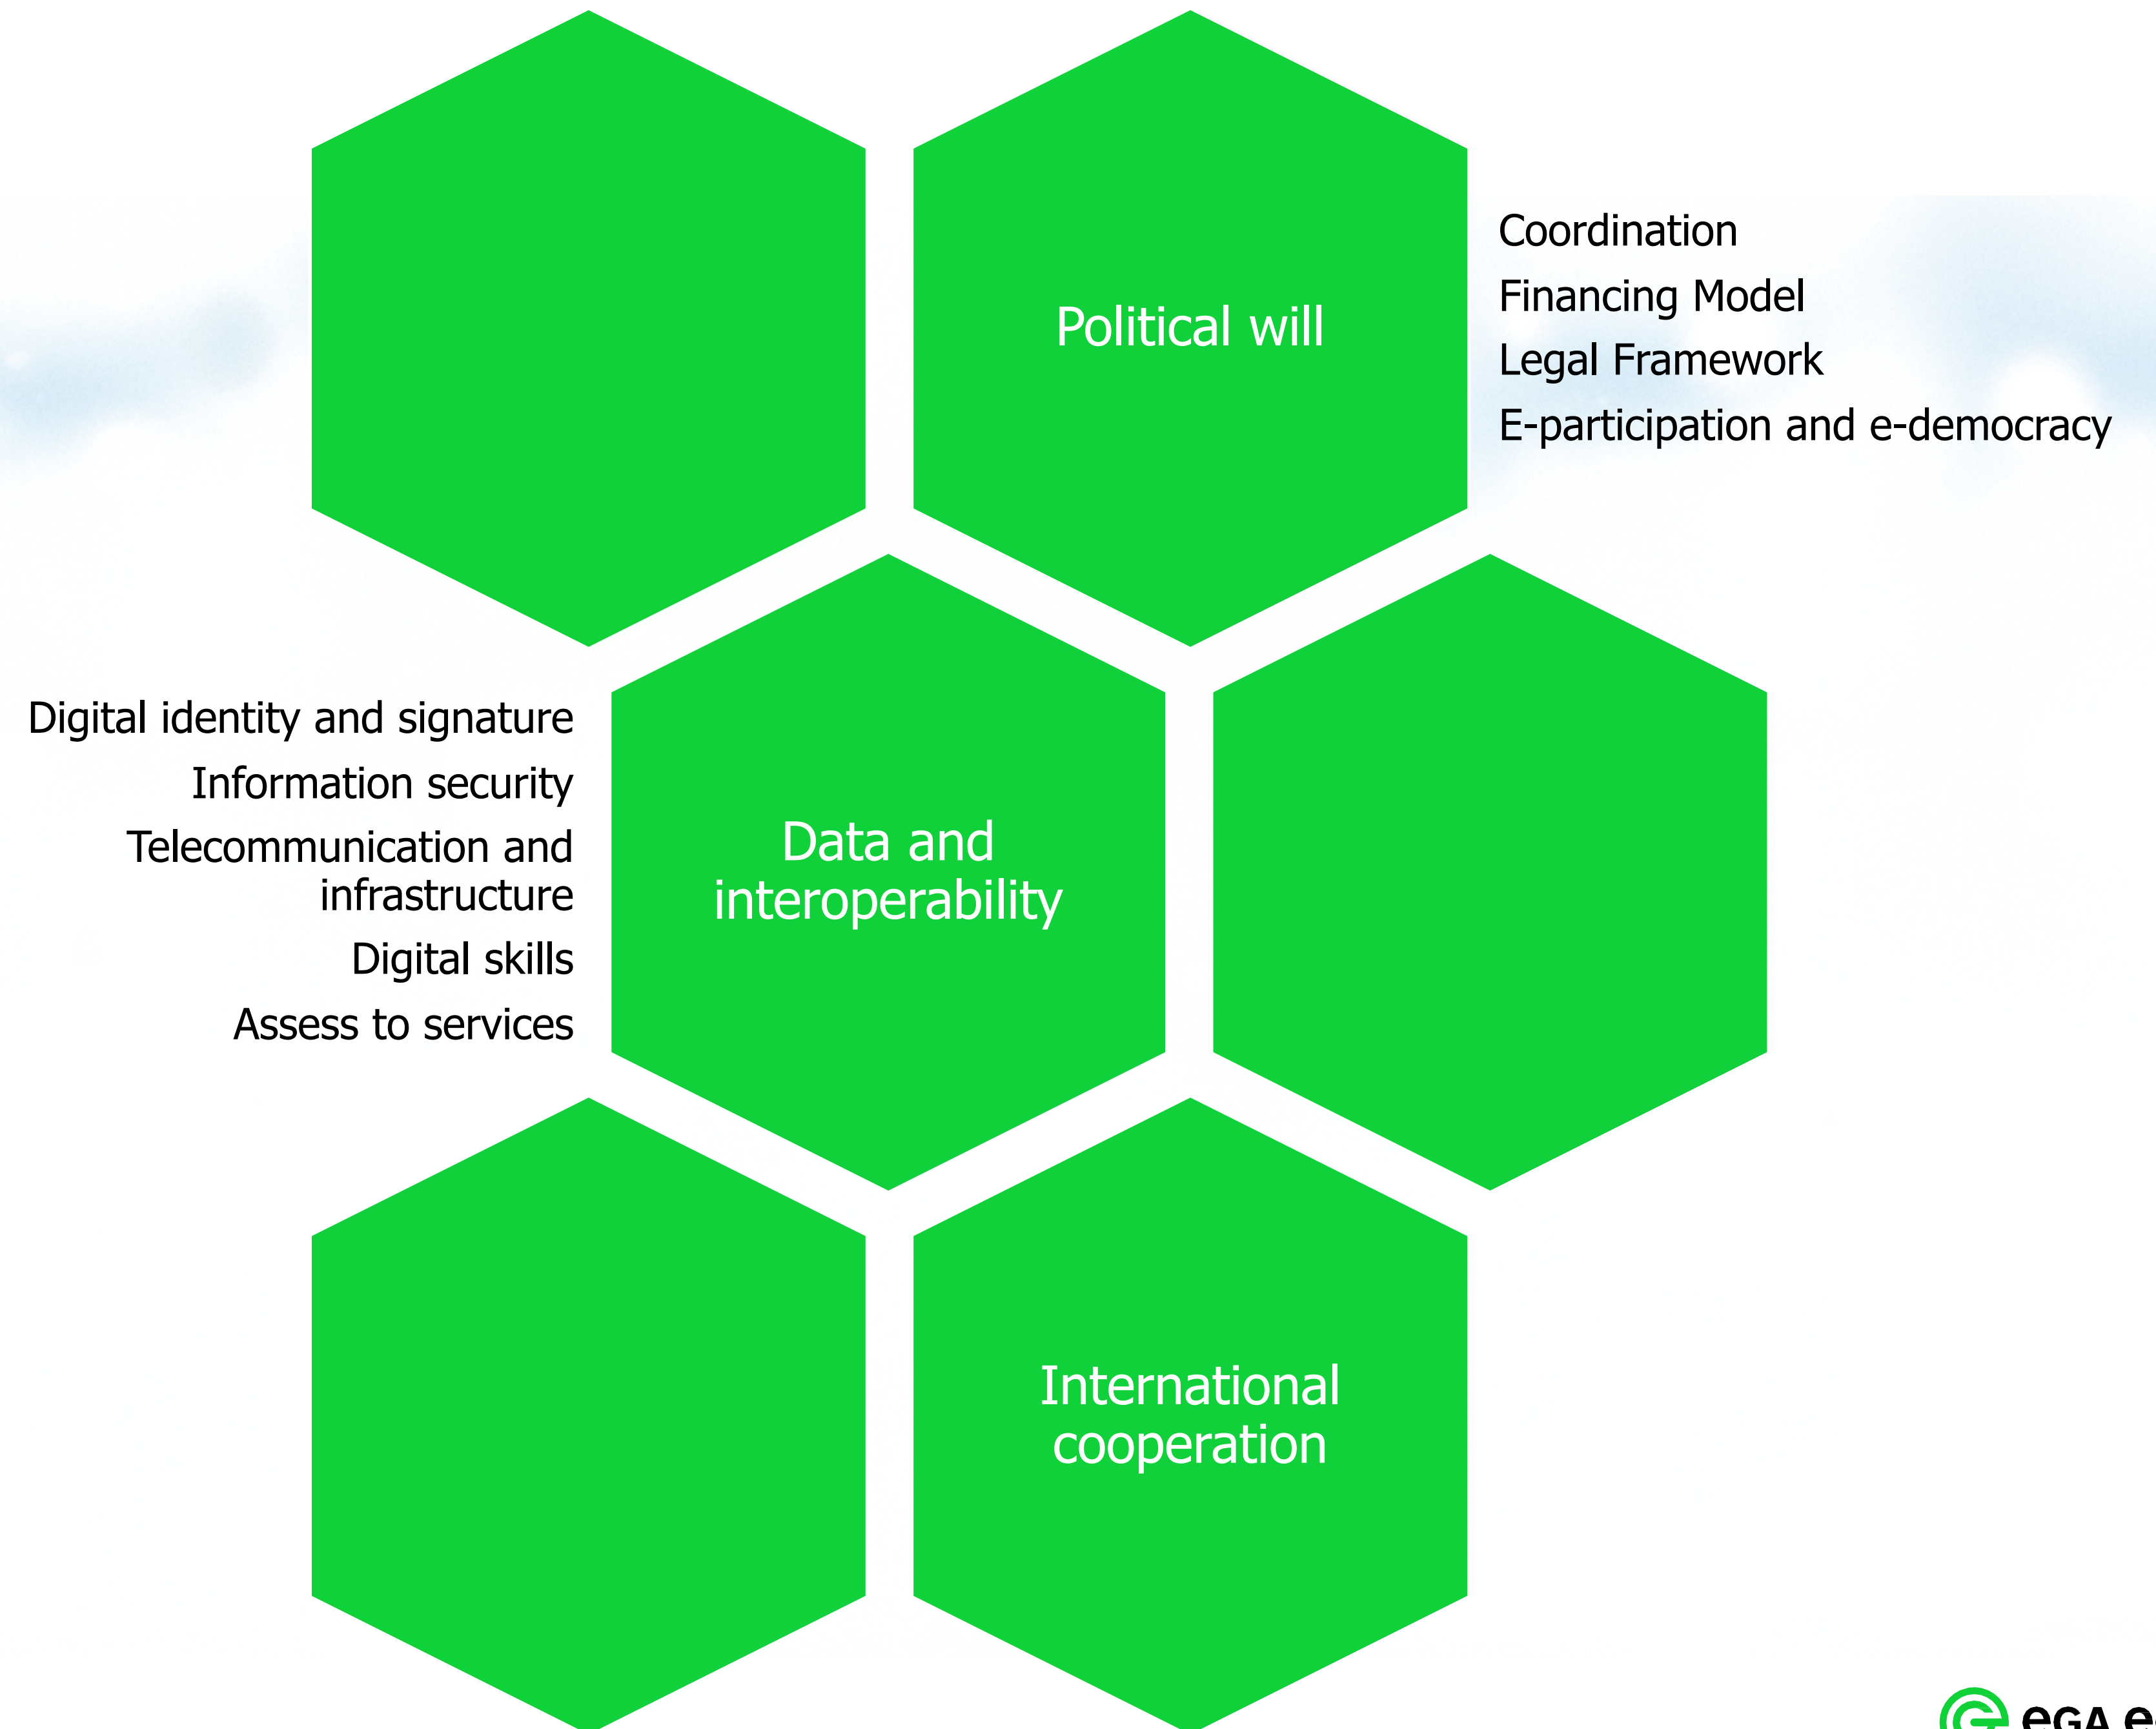

- ... agreed between MDAs and NITA-U.

Architecture Readiness Survey for Ugandan MDA

- Initial evaluation of the current digital maturity of the public sector.

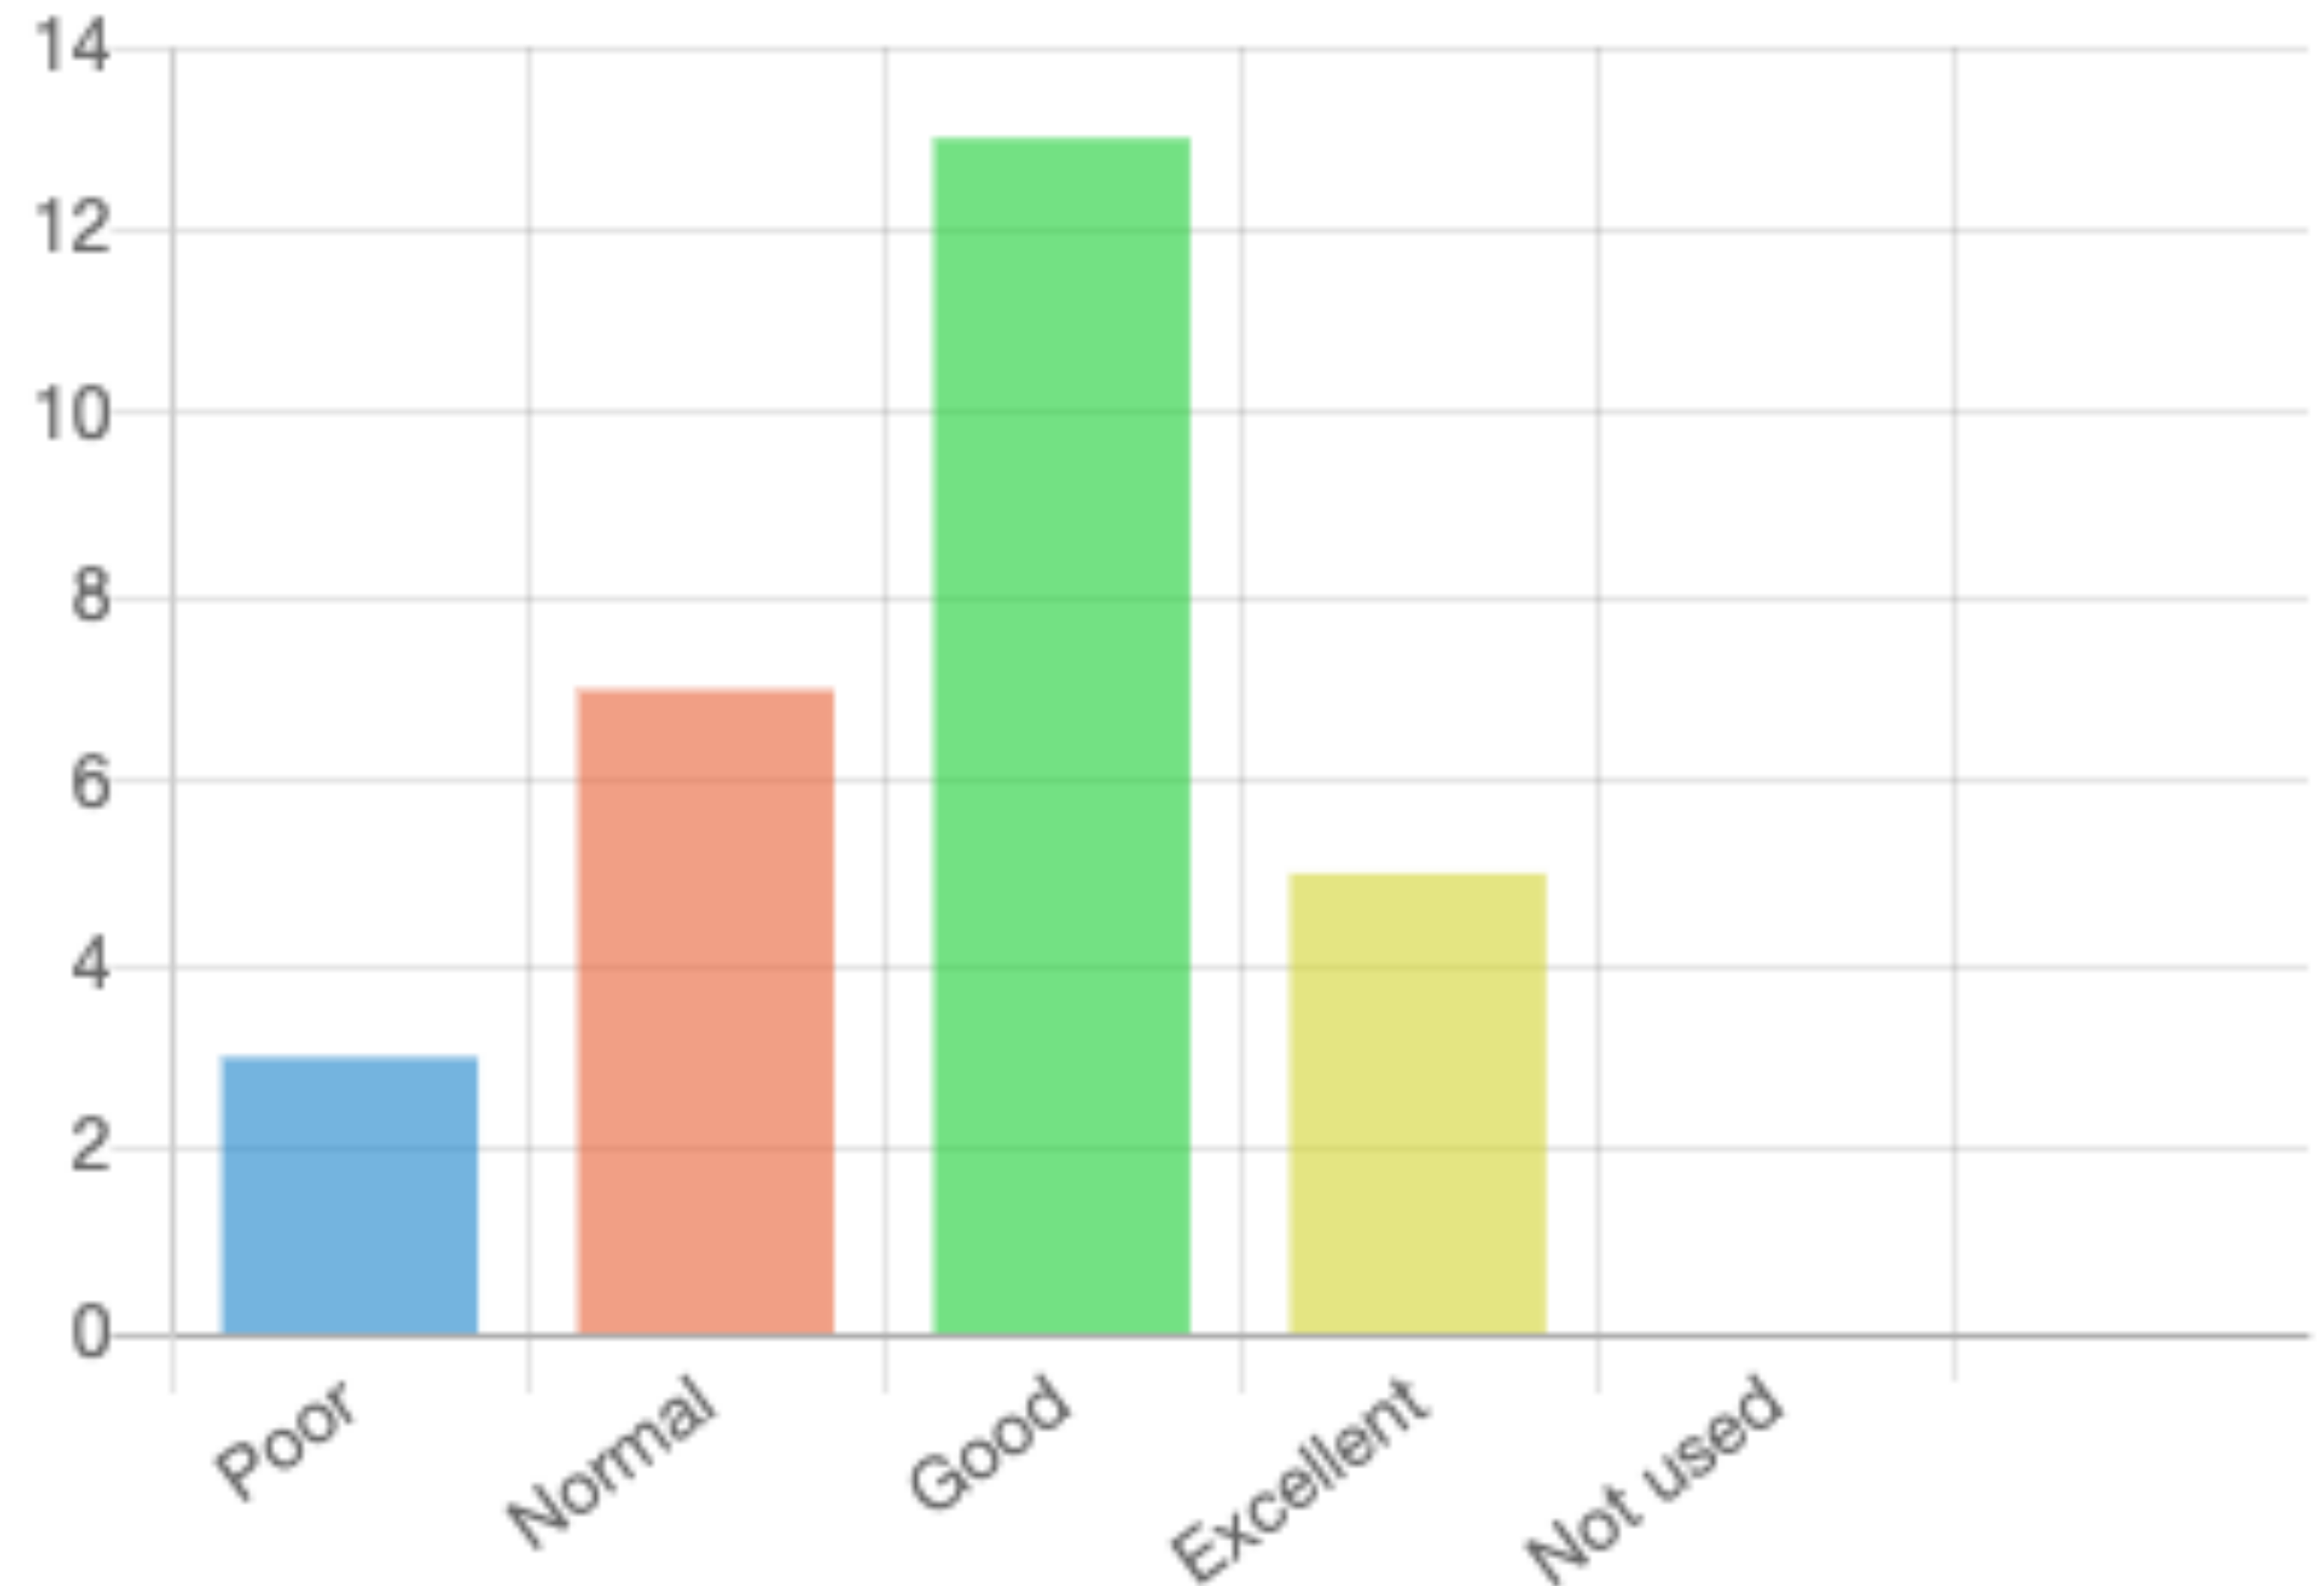

Focus Areas

Skills of MDA

- Rough average from non-ICT staff replies

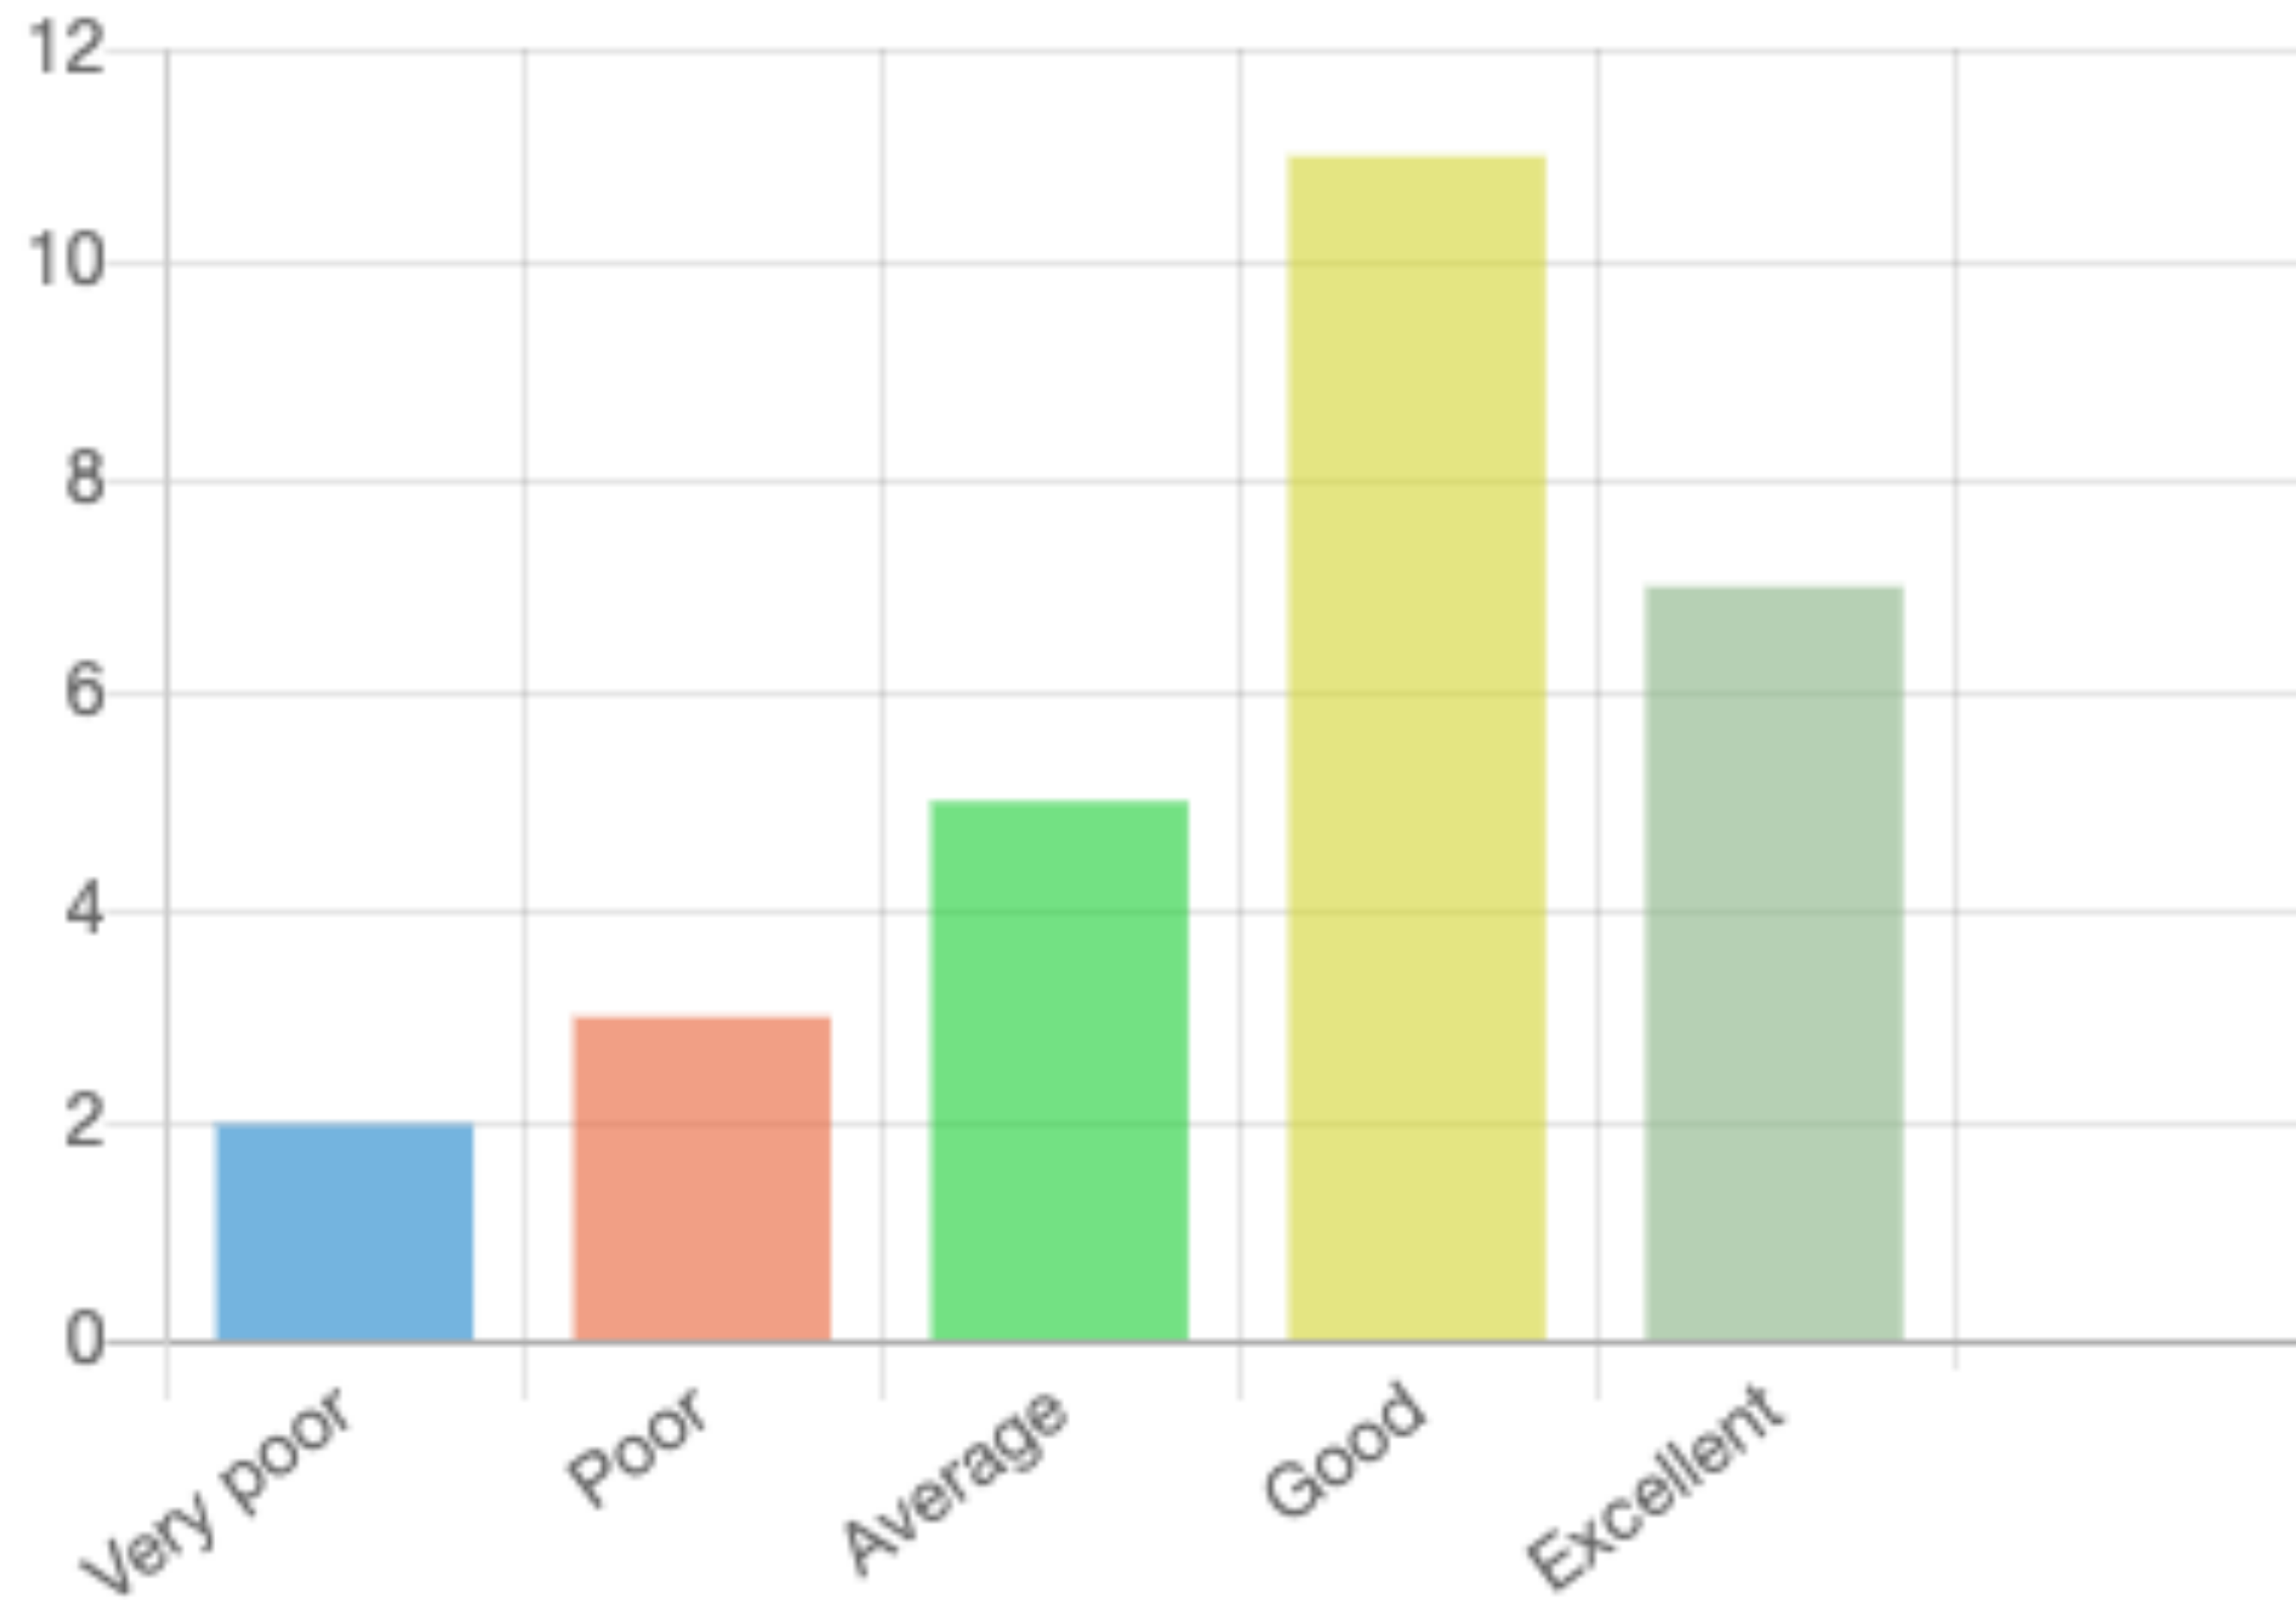

Please rate the average digital skills of your MDA non-ICT staff

Skills of MDA

- Rough average from ICT staff replies

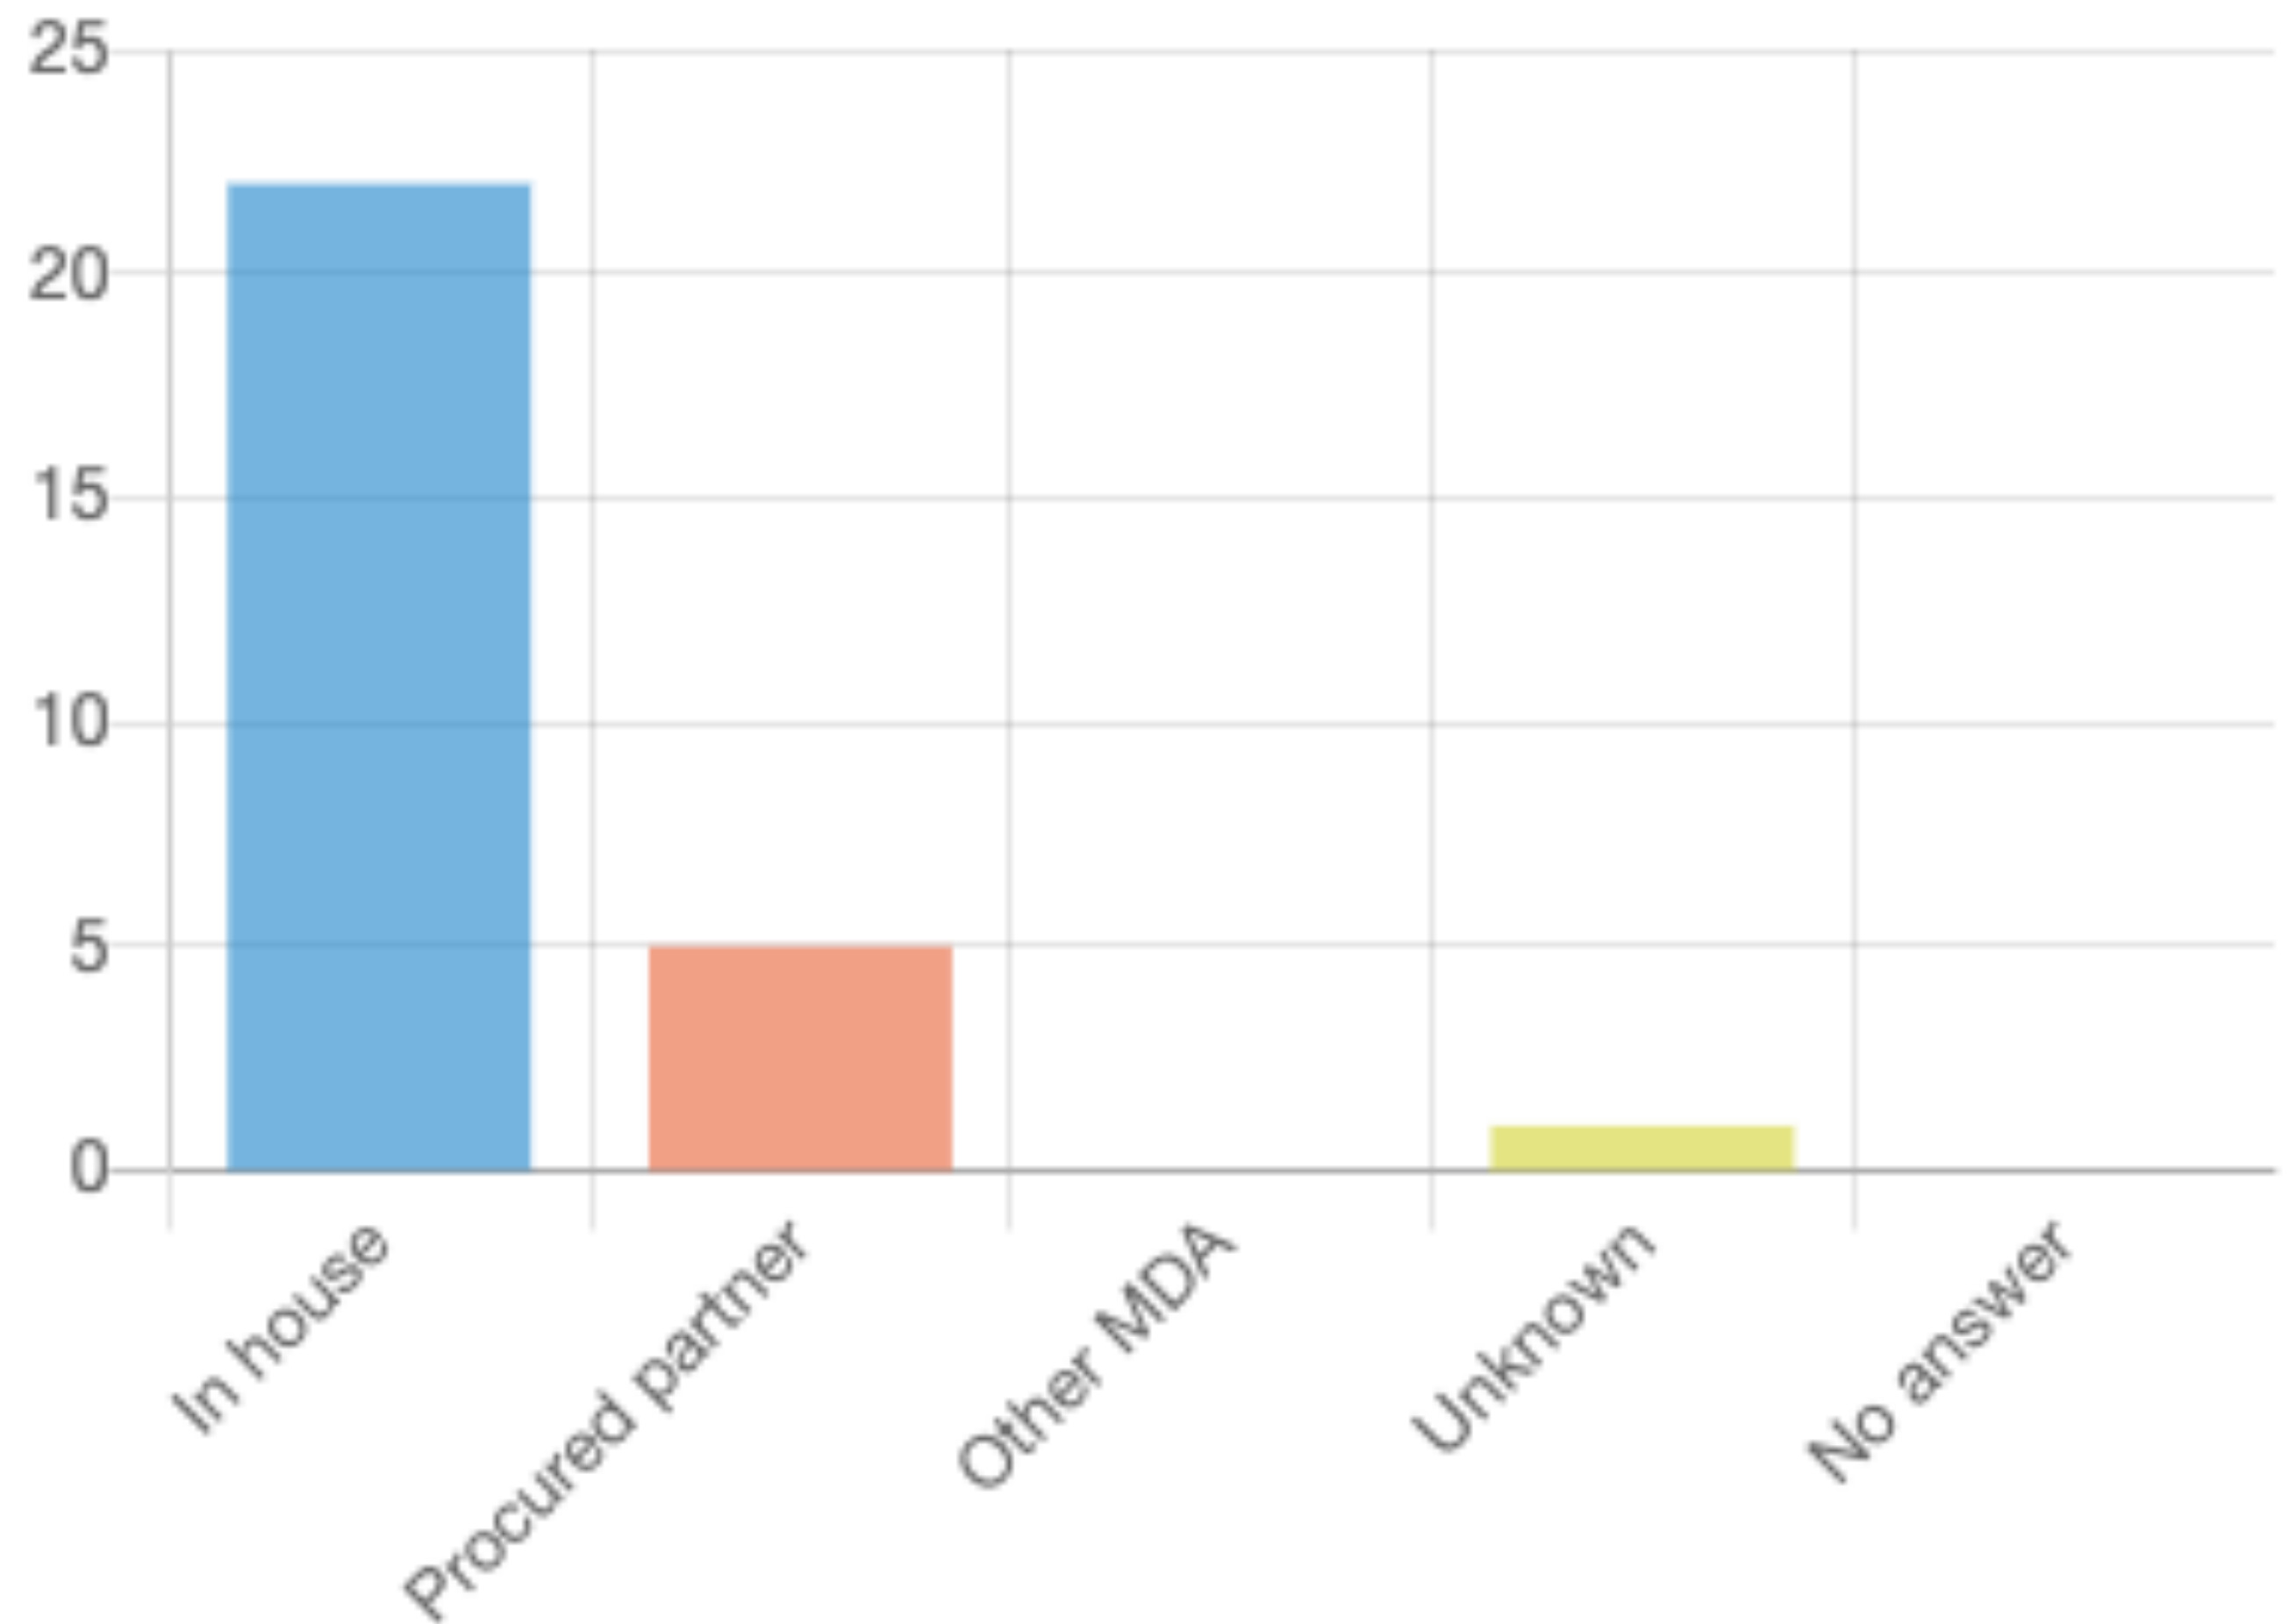

Please rate the average skills of your ICT staff

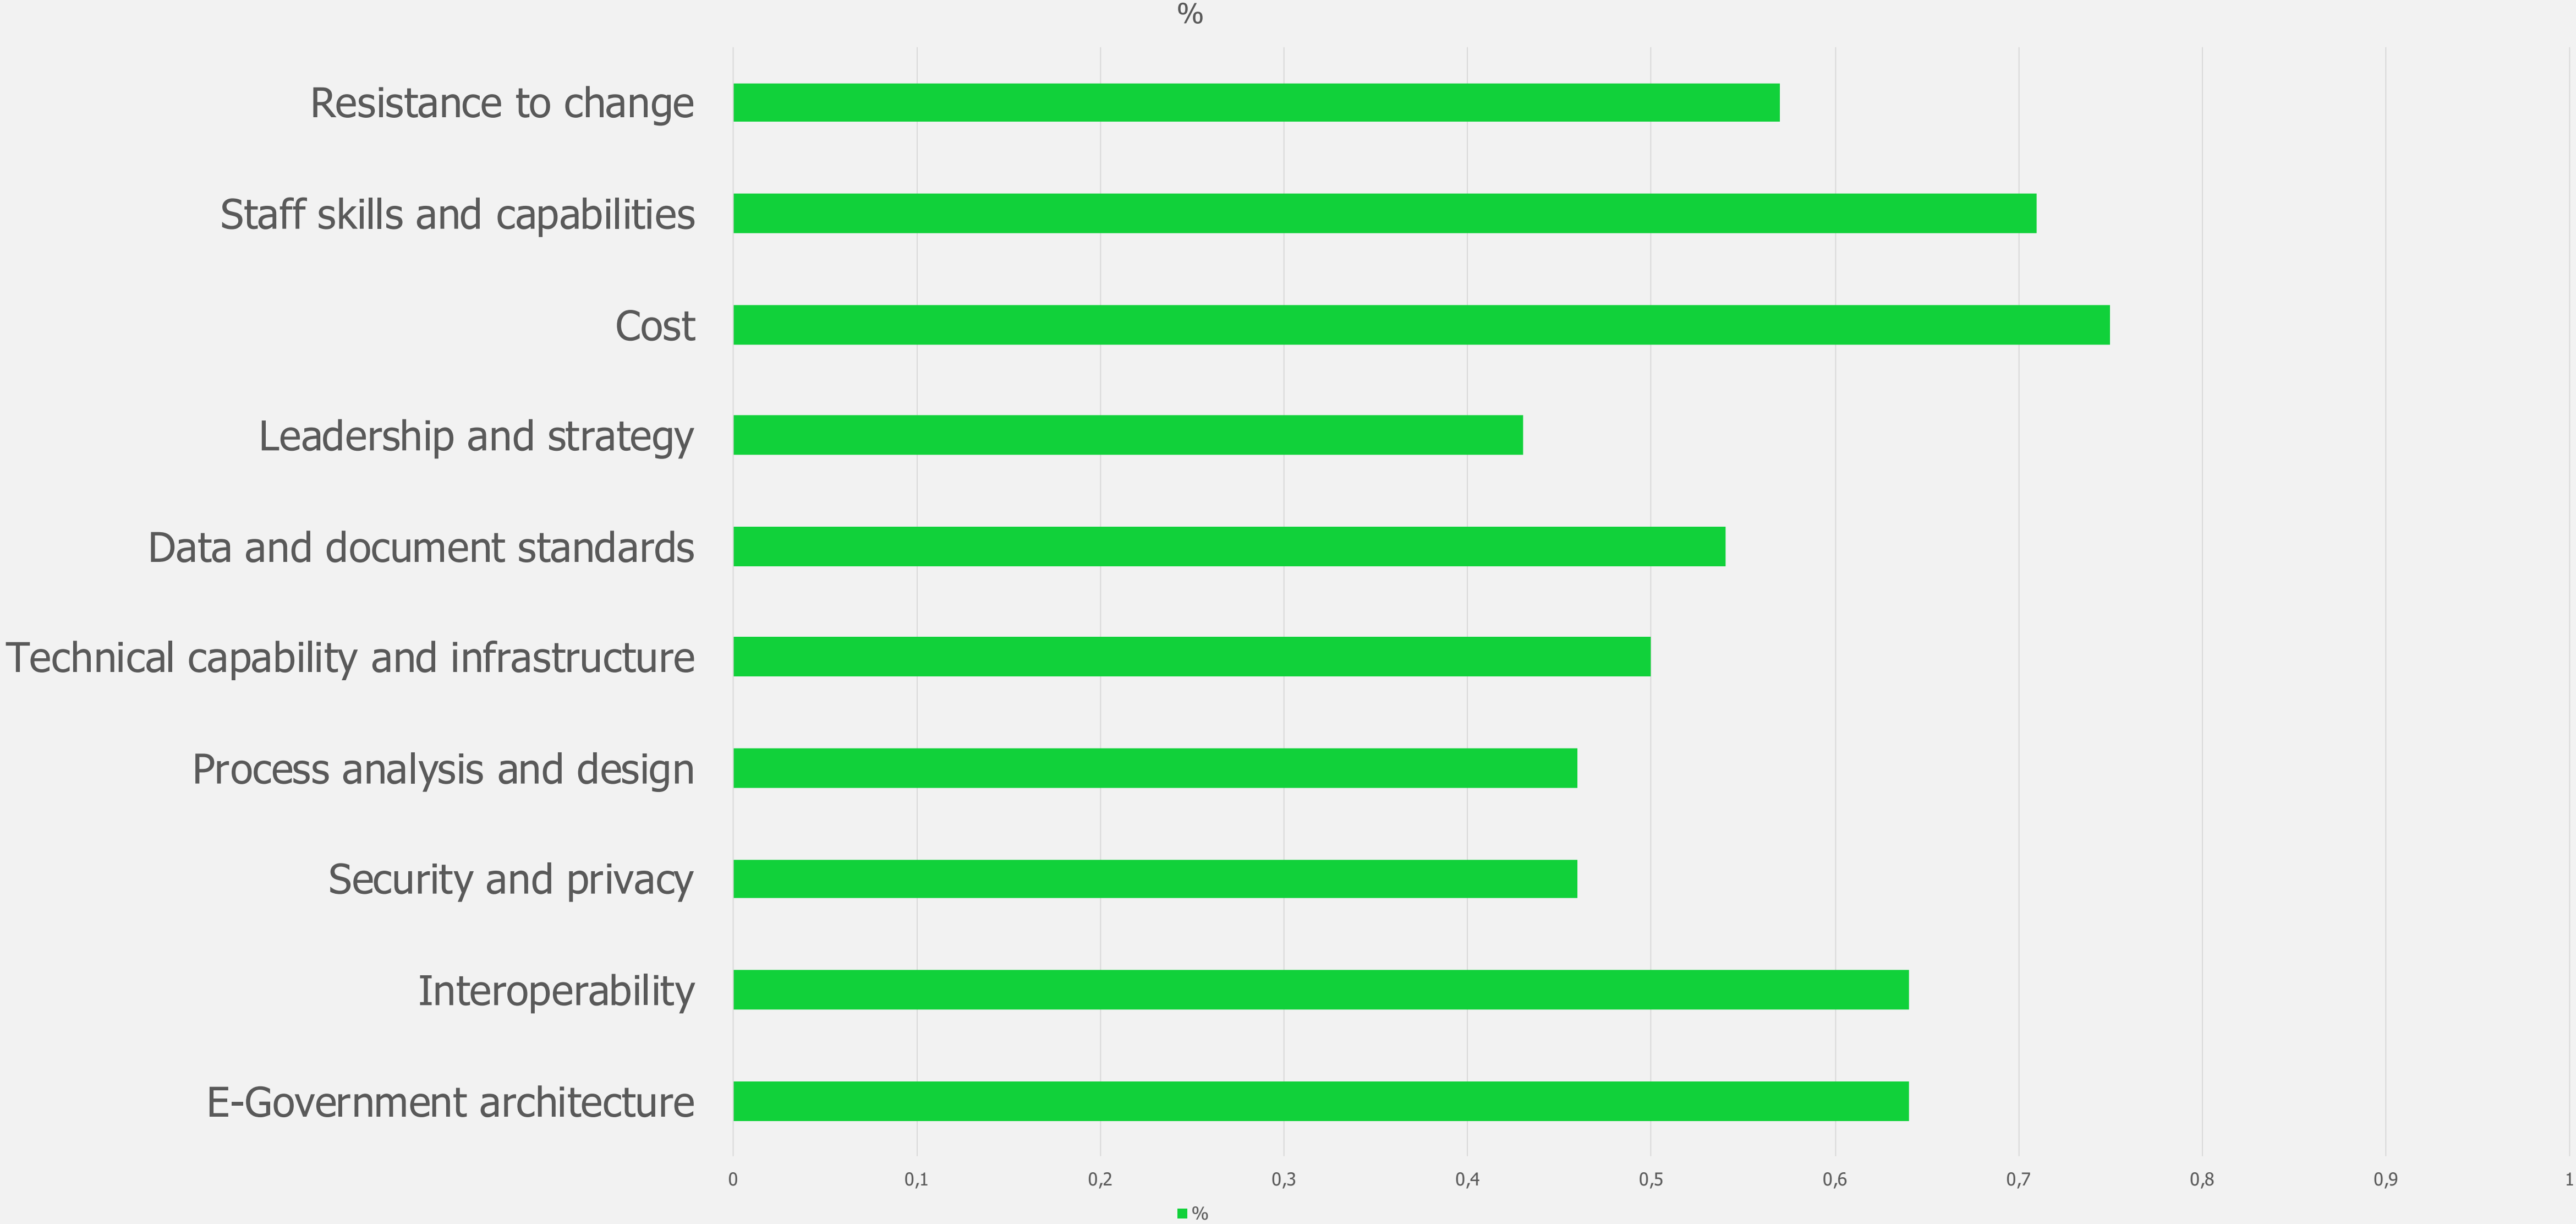

ICT Related Activities in MDA

- Rough average of typical response about procuring, development, administration, maintenance, planning...

Define how ICT related services and activities are implemented by your MDA ICT department(s)

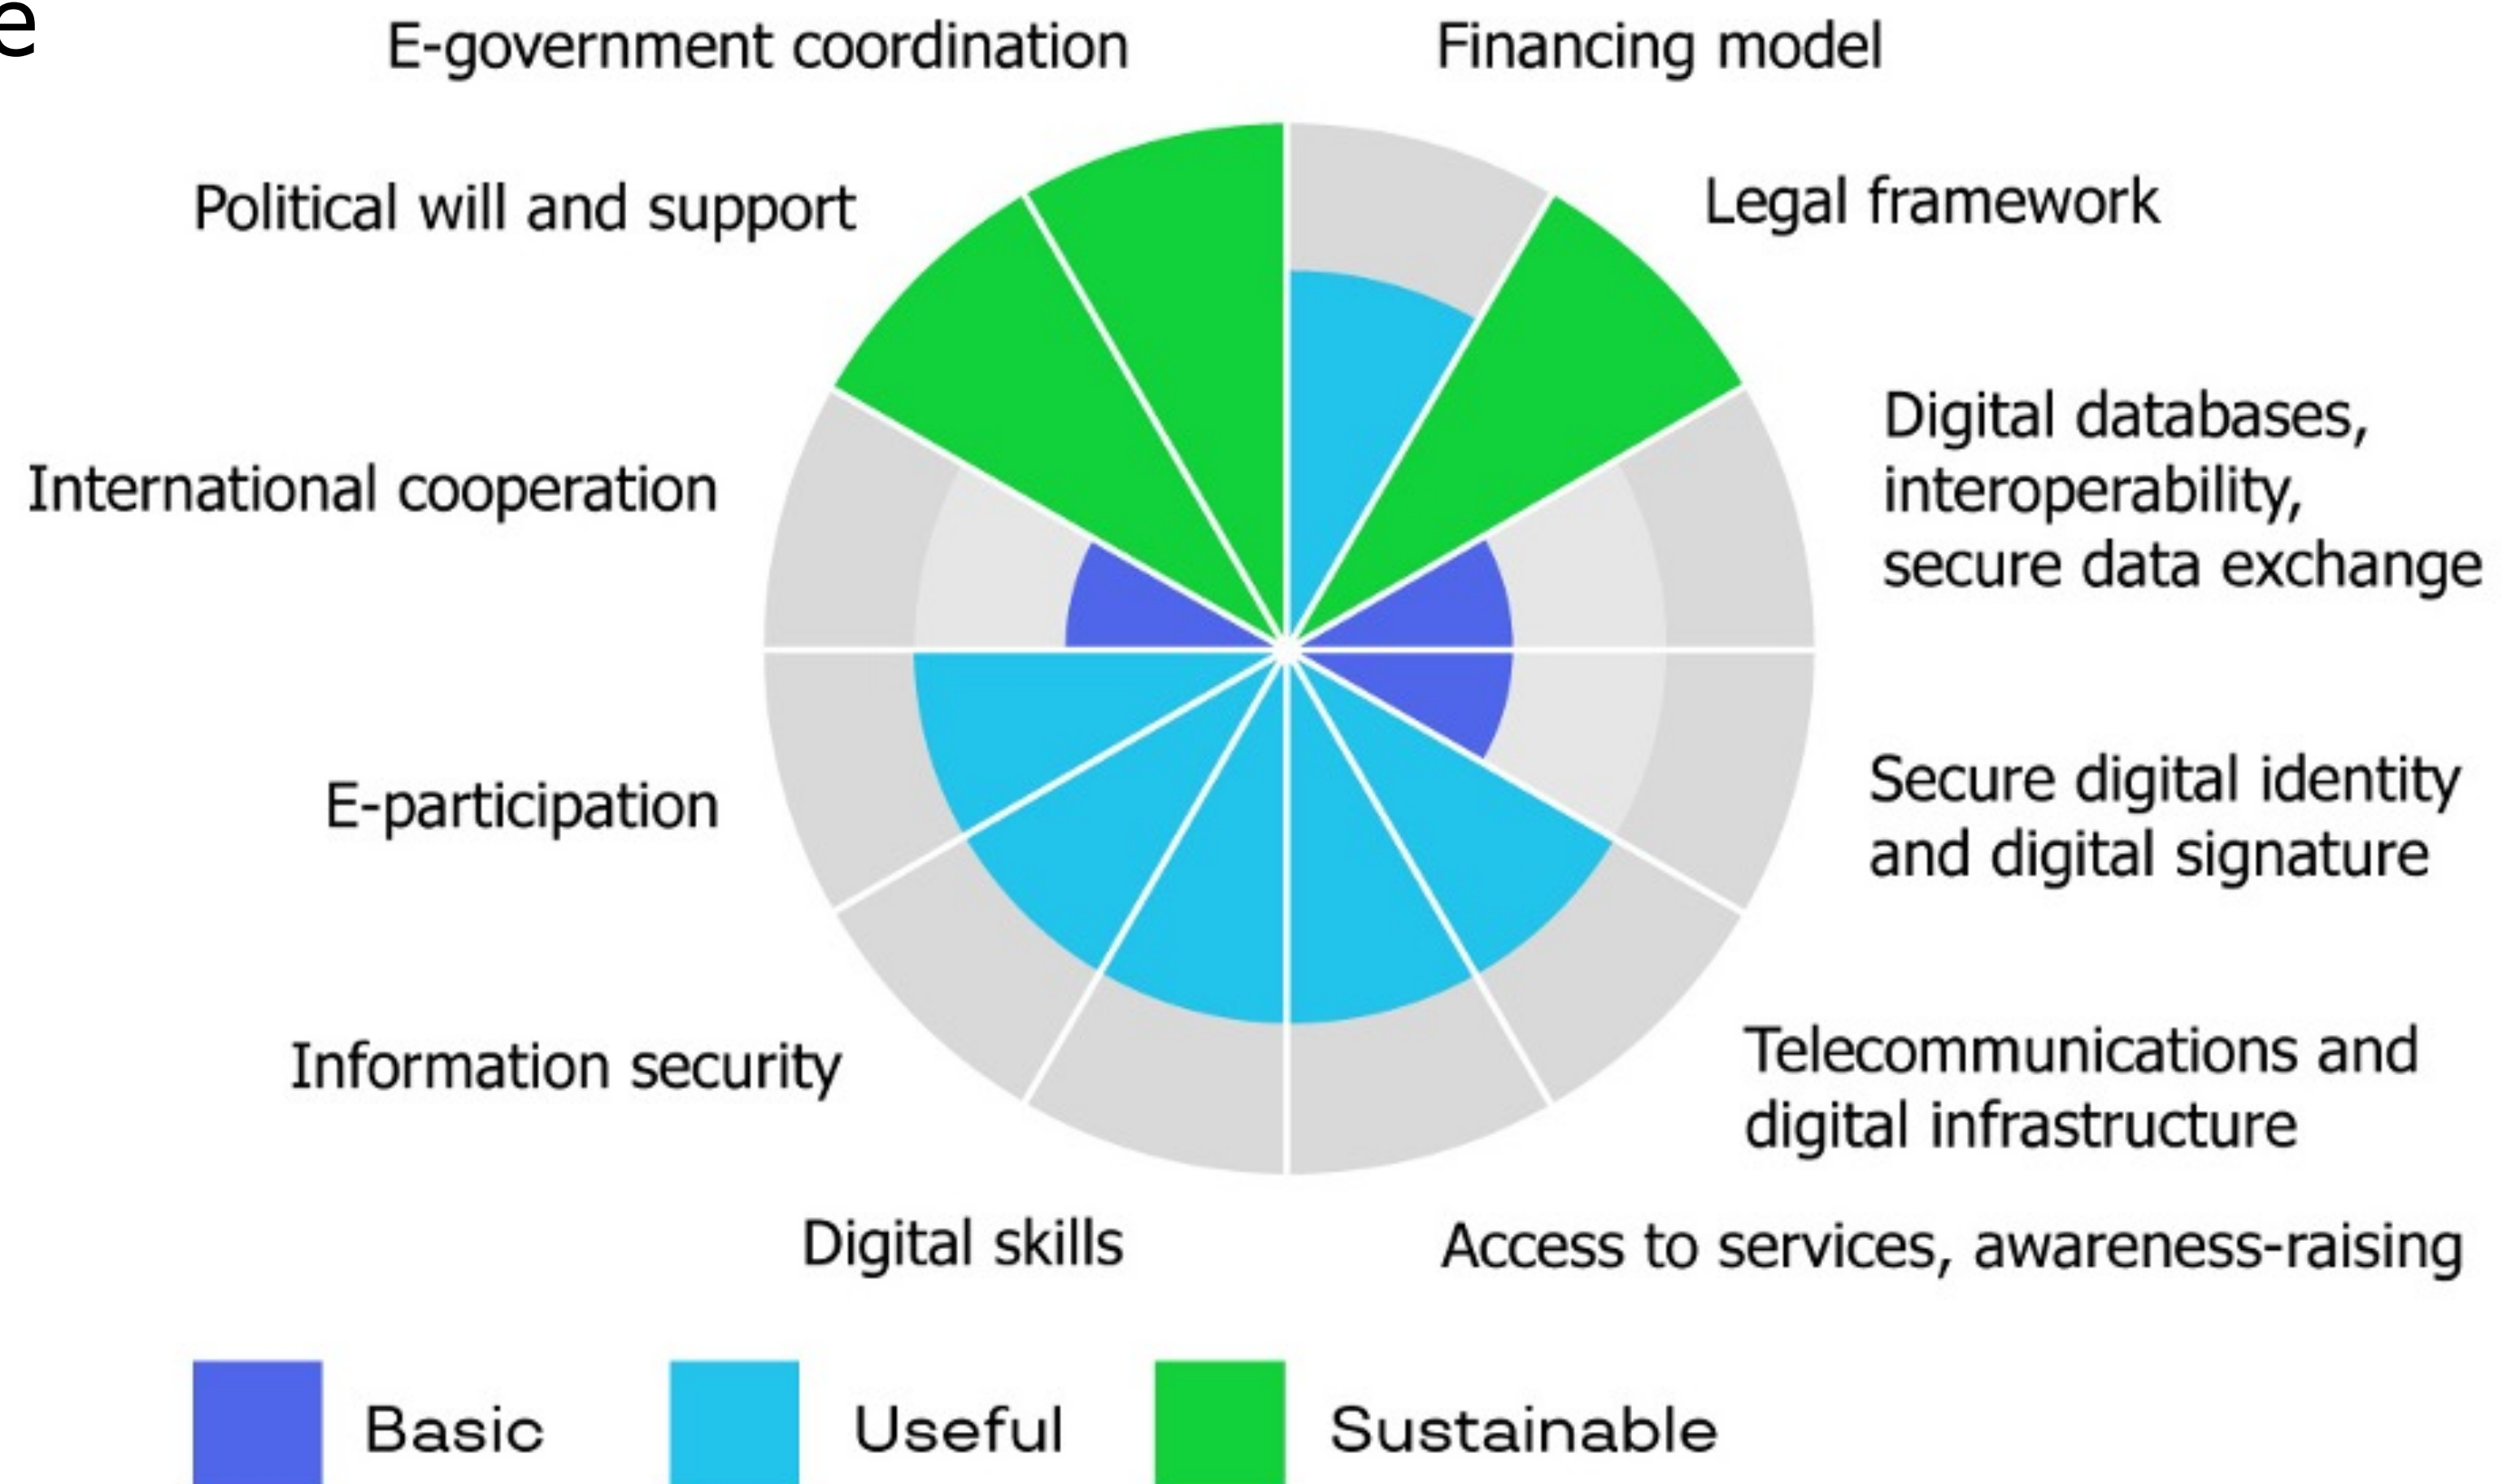

Serious or Some Issues

Self Assessed Maturity

- Policy level is seen as sustainable
- Organizational capability is seen as useful
- Technical maturity is seen as basic.

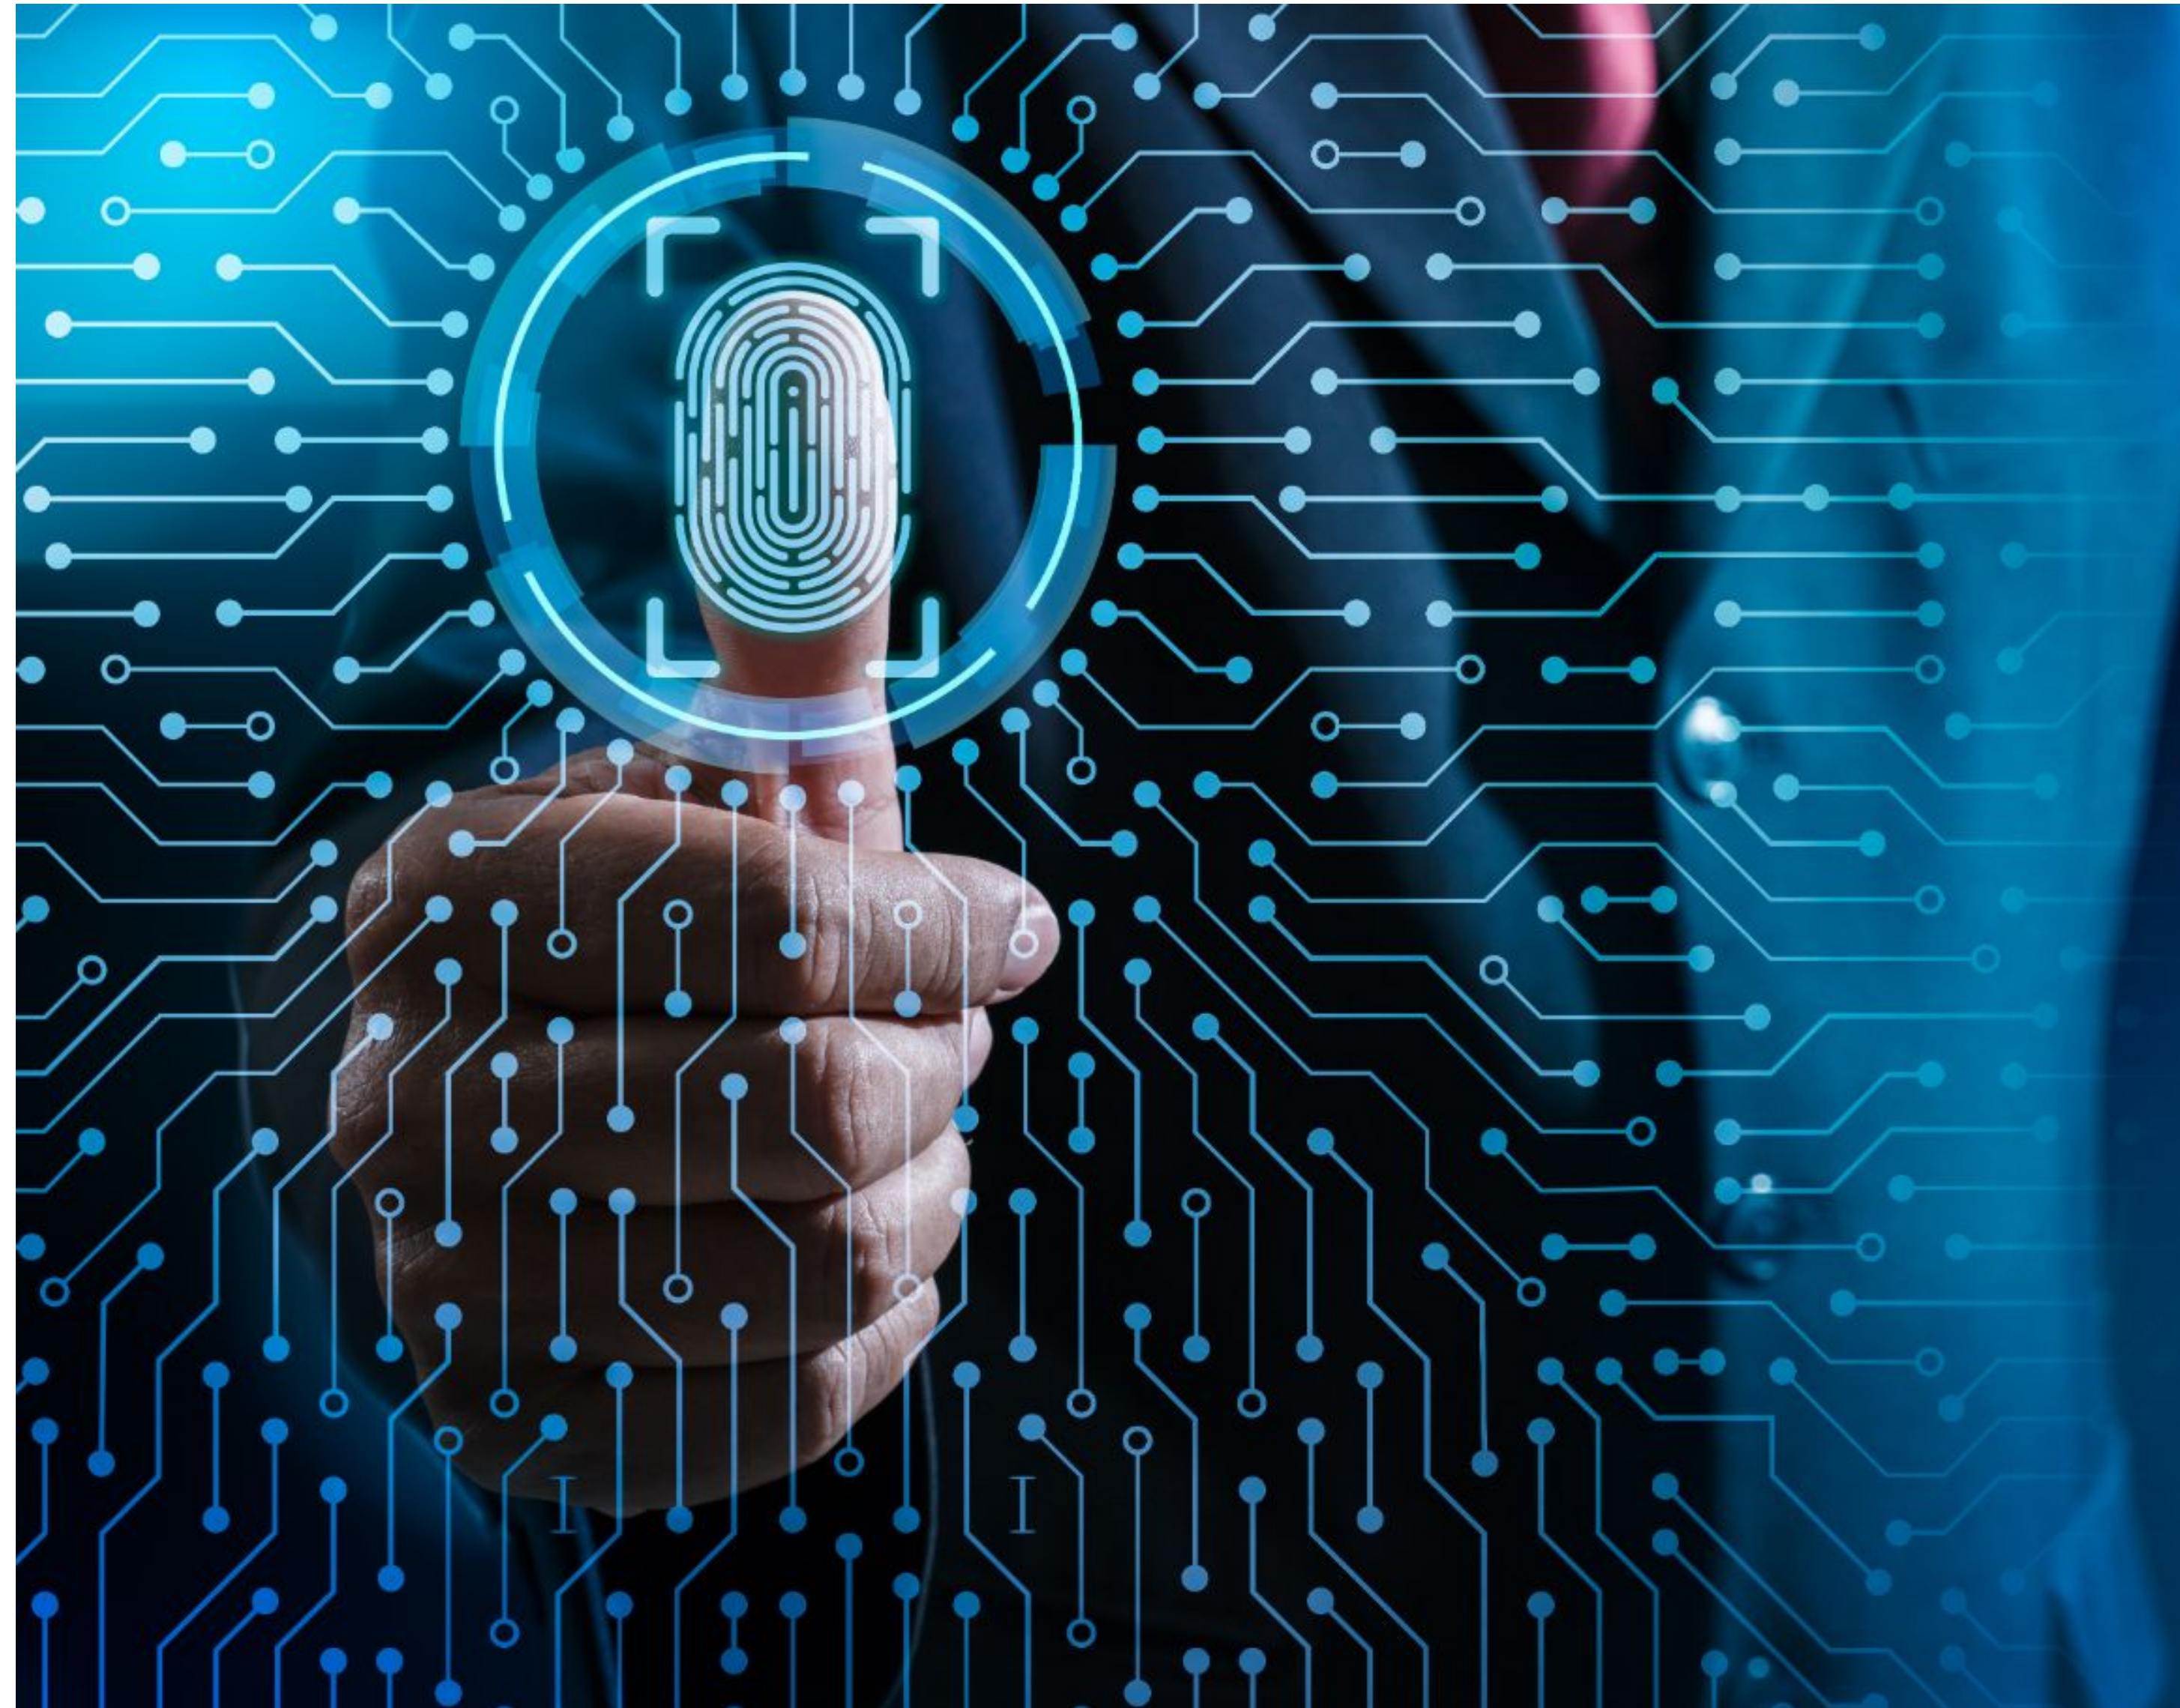

Database Interoperability

- Understanding and necessity to technically cooperate is there...
- ... but no obvious means to solve it.

Digital Identity and Signature

- Lack of well established digital authentication system is a major concern.

**Let's make
digital
transformation
happen!
Everywhere.**
